

The exhibition "Nature Connects Us" represents the first permanent setup of the Natural History Museum of Montenegro. After a number of temporary exhibitions which, irrespective of their limitations in lasting and space, achieved notable results, this exhibition is a step forward in the overall work and development of the Natural History Museum, from its establishment until now.

Montenegro is known for its biological diversity, where on a small space there is a great abundance of authentic natural habitats characterised by distinctive plants and animals. At this exhibition we present several natural entities with their natural opulence. Each complex has been presented in a separate diorama, representing a "clip" from the nature of Montenegro, but also a part of the overall natural diversity of the Adriatic Region countries we belong to. Dioramas are fully equipped and completed by the items of the Natural History Museum of Montenegro. This approach of presenting and interpreting has been used in the museums worldwide for centuries. However, on our exhibition the dioramas have been rounded by digital equipment providing for a simple access to all information about the exhibits. The concept of the space and professional texts are the fruit of work of all curators and other professional personnel of the Museum.

PRIRODNJAČKI MUZEJ CRNE GORE  
NATURAL HISTORY MUSEUM OF MONTENEGRO

Izložba „Priroda nas spaja“ je prva stalna postavka Prirodnjačkog muzeja Crne Gore. Nakon većeg broja privremenih izložbi koje su, i pored ograničenja u trajanju i prostoru, postigle zapažene rezultate, ova izložba predstavlja korak naprijed u ukupnom radu i razvoju Prirodnjačkog muzeja, od njegovog nastanka do danas.

Crna Gora je poznata po svojoj biološkoj raznovrsnosti, gdje na malom prostoru postoji veliko bogatstvo autentičnih prirodnih staništa koja se karakterišu osobenim biljkama i životinjama. Na ovoj izložbi predstavljamo nekoliko prirodnih cjelina sa njihovim prirodnim bogatstvom. Svaka cjelina prikazana je u posebnoj diorami, koja predstavlja jedan „isječak“ iz prirode Crne Gore, ali i dio ukupne prirodne raznolikosti zemalja jadranske regije kojoj pripadamo. Diorame su u potpunosti opremljene i upotpunjene predmetima Prirodnjačkog muzeja Crne Gore. Osim toga, po prvi put smo primijenili realistične modele za predstavljanje pojedinih organizama. Ovaj koncept prikazivanja i interpretacije vjekovima se koristi u muzejima širom svijeta. Međutim, na našoj izložbi su diorame upotpunjene najmodernijom digitalnom opremom koja omogućava jednostavan pristup svim informacijama o izložnim predmetima. Koncept prostora i stručni tekstovi plod su rada svih kustosa i stručnog osoblja Muzeja.
